

Preparing a vehicle for a race event requires special attention to details by technicians who understand motor sports and race their personal vehicles. At **Dynoexelixis** MotorSports we are passionate about racing and we compete with our vehicles on a regular basis. The same is true for our customers who book appointments for race prep before these precious days, to ensure safety and optimum performance of their vehicle. From a simple brake pad and tire swap, to chassis setup, roll bars and racing seats, we handle the details for all track events. We also offer track side support and driver coaching which can help to fine tune both the driver and vehicle. After race events, we service the vehicle, reverse the process and perform detailing services to have the car looking like new for street enjoyment. Some items and services we offer include: bolt in roll bars, 5-point safety harnesses, fire extinguishers, race seats, race brake pads, race brake rotors, high temperature brake fluids, race wheels and tires, corner balancing, track alignments, etc. Inquire for prices, specific details and custom tailored track packages that suit our specific needs.
